THE GATES OF THE CITY

MILAN INTERNATIONAL ARCHITECTURE WORKSHOP

The MIAW – Milan International Architecture Workshop – is the international intensive programme at the School of Architecture Urban Planning Construction Engineering. It provides an international design forum for schools, teachers and students, but it is also an informal platform to discuss issues and share ambitions that education implies. Its aim is to stimulate cross-over thinking between researches and practitioners in the design field, involving different scales and encouraging an interdisciplinary approach towards design problems. Each atelier has an International Guest Professor of high profile whose activity and interests are related to the different study courses and disciplinary areas.

This year, MIAW 2025 at the AUIC School of Politecnico di Milano turns its gaze inward—toward the memory and identity of Milan's historical center. From June 3–14, the city opens its ancient gates to new perspectives and architectural experimentation. Students and visiting professors will come together to reinterpret the heart of Milan through the metaphors of gate and memory—constructing one museum from seven different pieces. A fragmented cityscape reimagined, where the past and future collide to shape new urban narratives.
